

We are sure you have all been working very hard at home. We are trying to provide activities that will help you to progress in your learning, keep you busy and interest you. Unfortunately we are not getting the opportunity to see much of your work! Here is a quick guide to help you upload your work onto Google Classroom. That way we can view and comment on the work you have completed. Working on paper is absolutely fine. You could even upload a photo of your work.

Log on to Google Classroom.

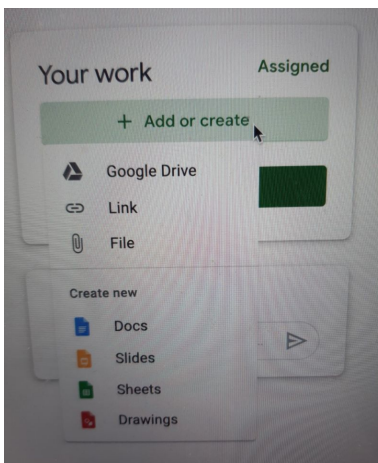

Click on your year group.

Click on the assignment that you have completed.

Find the box that is titled Your work. Click add or create. It is on the right side of the screen.

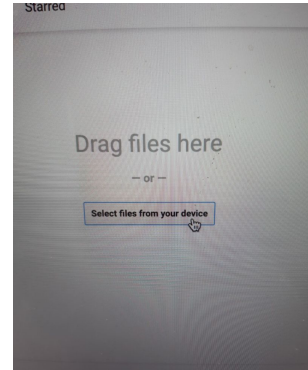

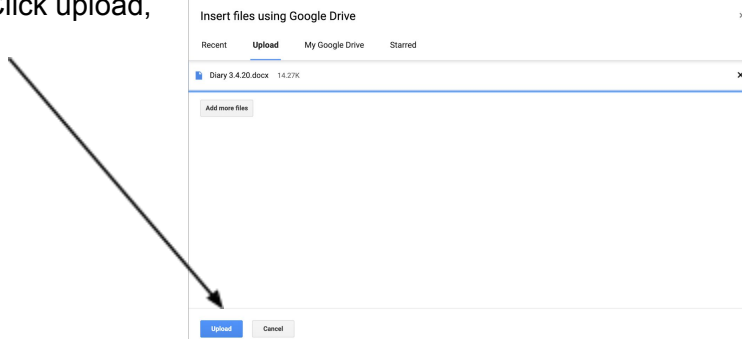

If you have worked and saved your work on your computer (a word document or something similar) click file.

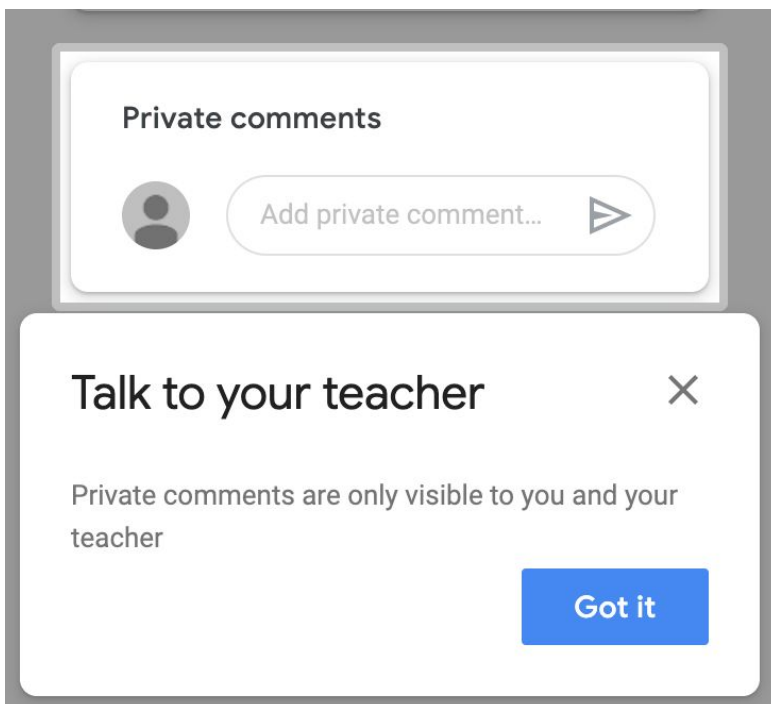

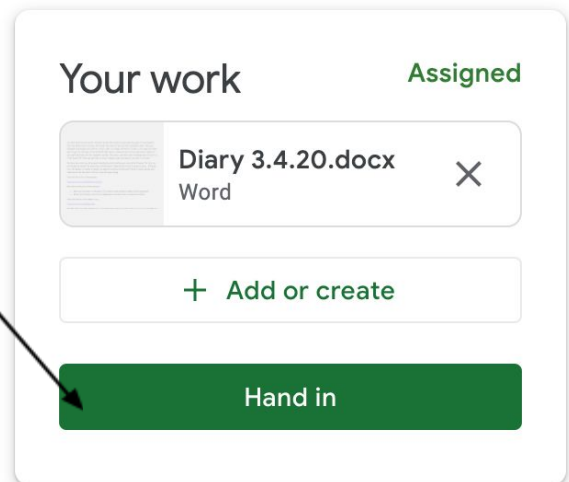

Click the option to select the file from your device.

Find the file that you wish to upload and click select.

Click upload,

Next you must click Hand in.

You can use the private comments box and your message will be visible to all year 6 teachers. We can reply here and answer any questions you may have and hopefully help you out. We will also comment on any work that you upload.
